

## **Reflections Applauds Recognition of Killalea as a Nature Reserve under NPWS Banner**

**As the Land Manager for Killalea Reserve since 2015, Reflections Holiday Parks applauds the NSW Government's recognition of Killalea as a Nature Reserve under the NSW National Parks and Wildlife Service (NPWS).**

Reflections Holiday Parks CEO Nick Baker said the environmentally sensitive landscape of Killalea made it a perfect fit with the National Parks and Wildlife Service's dedicated role in the conservation of biodiversity.

"Killalea Reserve is a vast 260 hectares with less than 2 percent reserved for caravan and camping," Mr Baker said.

"This decision recognises that the unique characteristics of Killalea align more with the strategic objectives of NPWS, including areas such as the wetlands and the ecologically endangered communities.

"Reflections is committed to working in partnership with NPWS over the next twelve months as the transition of Killalea takes place.

"We understand the absolute value this pristine reserve has for surrounding communities including our staff on the ground, and we are looking forward to the continuation of the care and maintenance of Killalea for the people of NSW and visitors to the area for generations to come.

"Reflections will continue to invest in maintenance of the camping ground and reserve until formal transition of Killalea to NPWS on 1 July 2022."
