

# Recreational and Fitness Facilities - Nature playground, outdoor fitness equipment and guided walking trails

Killalea has various trails linking different parts of the park. Fun runs and walks are also held in the park throughout the year.

Improvements to the trails are proposed to further enhance the visitor's experience at Killalea. This could include:

- Provision of outdoor fitness equipment and a children's playground to create recreational precincts. Placed adjacent to existing walking trails, this will promote a healthy lifestyle by encouraging people from all age groups to participate and be active outdoors.
- Interpretive / heritage signage to assist in the story telling of Killalea.
- Linking the trails to the proposed and existing facilities.
